

LAUNCHING THE ISLAMIC FINANCE COUNTRY REPORTS

THE ISLAMIC RESEARCH AND TRAINING INSTITUTE (IRTI) launched a new series of country reports which were produced jointly under a strategic partnership with Thompson Reuters and CIBAFI. The three institutions decided to put together their complementary expertise in order to offer to the public, free of charge, the best analyses and insights on the Islamic finance situation and investment environment of IDB member countries. Two reports have been produced during the year 2013, one for Tunisia and the other for Turkey. Other reports are in progress.

Since its establishment in 1981, as the research and training arm of the IDB Group, IRTI has been one of the major institutions in the world that contributed to the development and dissemination of knowledge in Islamic economics and finance through research, advisory, capacity building and provision of information services in the light of Maqasid Al-Shari'ah (objectives of Islamic law).
